looking for someone to help me realize a costume (like medieval knights armor)
can this be done, or does the size limitations of 3d printing make this not possible?

in particular:
<http://board.belegarth.com/viewtopic.php?f=107&t=33809>

It is possible, because the max. size for steel is:
1000x450x250mm

But It would be expensive (\$8.00/cm³)
see: <http://www.shapeways.com/materials/steel>

Regards, Chris

Hi there,

We may be able to help you in this project. It may be extremely expensive 3d printing. We could cnc machine it out of wax then cast it in aluminum. If interested contact us at designanything3d.com
