My first 3D-Project - the M577 APC from the Alien movie:

Idea and creation in Sketchup

Result:

Now i'm waiting for the front weapon and then i will start painting...

Regards
Torsten

Haha, very cool! Just the other week I was actually at and aliens marathon with a few friends, so this is still pretty fresh in my memory.

Hudson:

Check it out! Independently targeting particle beam phalanx. Vwap! Fry half a city with this puppy. We got tactical smart missiles, phase-plasma pulse rifles, RPGs, we got sonic electronic ball breakers! We got nukes, we got knives, sharp sticks...

Today the final part arrived: the front gun:

Very fine details printed:

nice.
Will it available in the Shop?

I will present an improved design with realistic shape, better wheels and more details:

(Prototype printed on a HP DesignJet 3D)

For reducing the material cost for the prototype printing the Model is designed like a plastic kit

For Shapeways the body will be complete printed. Wheels and Guns are separate.

Hey tengel,

I removed the second image in your post directly above as it contained the URL of a competing service. We're not too fond of that Maybe you can block it out?

Cheers,

Bart
