I am looking for a 3D modeler to collaborate with. I fabricate jewelry but do not do any 3D work. This would be an on going gig paid per assignment. I need someone who is experienced enough to do very intricate and detailed work but, willing to do simple things as well, since project will vary. Ideally this person would have an open schedule so I can send projects and they get done in a timely fashion. Thank you in advance!

Had done jewelry in the past. Open to new ideas. Had been interested in collaborating with a designer to do the very same thing you are offering.
Have my own 3D printer that prints in plastic and can use shapes for metal, ceramic and other material works.

See my site www.ComesToLife.com for examples of my works with 3D. Can do virtually anything.
