---

I have extensive knowledge of Mechanical Components and design.

However, all areas of product design are of interest.

I am able to consult for all stages, from design, modeling, to prototyping.

Essentially, wether you are in the initial sketch stages, or simply a thought - i would love to be of assistance in making your thoughts and ambitions come to fruition.

I have a 3D printing machine, along with a CNC.

I am located in Melbourne, Australia.

Please contact me if you have any design queries.
