Looking for a designer who can take 2D drawings of military vehicles and convert them to 1/87 scale prototype 3D printing suitable for casting production in polyurethan resin. Prototypes need to be designed in a modular fashion to accomodate resin casting. For example, separate wheels or tracks, separate turret, etc which can then be assembled by end user customer.

Just sent you an email, let me know if you still need someone for this service.

Thanks,

Tom
