Hello,

I am seeking a 3D model of a miniature wooden signpost.

Here are some requirements:

- About 10cm tall
- 3 arms
- A cylinder pole so that the arms can be pointed in any direction (not flat sided like the pictures)
- Inset text on the arms (I will be painting the text a different colour to the rest of the sign, so inset enough that it can be painted).
- Wood texturing (3D), similar to this model:  
<http://www.shapeways.com/model/694469/r15-n-scale-coal-jimmy-wood-truck-x3.html?li=productBox-search>

And here are some photos for inspiration:

<http://www.flickr.com/photos/34263657@N07/6928844475/>

<http://www.flickr.com/photos/steveharris/4622264195/>  
<http://www.flickr.com/photos/lauriemayes/8183114935/>

I will be printing the signpost via Shapeways, and rendering it in X3D. So a blender file would be best if this is possible (I am not versed with 3D modelling compatibility so whatever works!)

Send me a PM if you are interested with any estimated cost etc!
