I have a product in mind to manufacture, and need someone who has an eye for design to help the idea come to life.

A few notes.

- a simple plastic case
- size: just under the palm of a hand
- design style.... Think: "if apple was to make a small plastic case, it would look like....". So, creative, sleek design.
- challenge: explore different possibilities for a creative hinge and closure for the case.)Right now, I am exploring the idea of a living hinge, a clam shell design, and different closure options, but I am open to other ideas)

If this sounds like a project you'd be fit for, give me a shout, with some of your work attached.

Thank you,
Ouja Denn
