Hi all,

Very proud to present:

Aromaph

(click for product page)

A mysterious dark and weaving ceramics piece that forms a uniquely shaped toroidal aroma bowl. Fill it with your favorite potpourri or scented water and enjoy the synergy of senses!

Love the quality of ceramics, seems to get better every time!

Cheers,

Stijn

Nice quality indeed. Almost looks like a render. Imagine a traditional potter trying to make something like that...

Glenn
