Finally! Thank you Shapeways and UPS, for the great service! I'm so happy!  
It feels a bit raw (like fine sandpaper), but is overall very smooth and curved. Nice straight angles!  
I love it!

SERIOUS... i love it!

I like this a lot!

Yes, the WSF has that odd 'sandy' texture to it when you first handle it.

Are the studs brick compatible?

Tnx!

Brick compatible. However, i knew upfront that lego uses .05mm specs for a nice tight fit. They have a slightly loose fit now. Painted should be a bit more tight afterwards.

In the photo, i placed it on some bricks, the bottom fits as well! It sticks
