Hello,

I happen to have a heart model I've used for another project that can be modified and scaled for your print job. I can work with you to exact the right features you would like displayed on your heart model. If you see the attached image, I animated a veterinary medicine video and modeled a heart to show vital signs, heartbeats, etc.

Here is a link to renders from recent medical projects.
<http://johnot.viewbook.com/album/johnotmedical> I create models for movies, and enthusiasts in many fields.

Best Regards,

John O.T.
