It's my understanding that the model was done in full color sandstone and the eyes were post-process clear coated in polyurethane to give them that realistic glassy look.

Is that the "3D printed new and improved girlfriend" you've been looking for?

hehe Hi Natalia!

So what's going on anyway? Or is it top secret? Did Shapeways hire her to do some modeling for some 3D printed fashion items or something like that?

I'd like to design something for her. Shoes or a dress or anything! Does she have a scan of her body that is available?

I haven't posted anything up, but I've been working on fashion items since that is a good direction to go in for 3D printing.
