Co-Creator is behaving very strangely. I'm using the latest version of Firefox on Windows Vista. Sometimes Co-Creator saves my selections, but sometimes it just randomly loses one or more of the settings I've saved. I'm trying to set up a full color sandstone loop that customers can display multiple photos on, but I can't get the picture fields to add correctly. Also, the Co-Creator window says that users can add up to 20 fields, but the most it seems to let me add is 5, if it saves any of them at all. Is there a way you can fix this? I want to allow customers to upload 10 photos. Very straightforward. Thanks for your help.

Hey JeremyMallin,

sorry to hear that! Could you share the link of your Co-Creator with me (you can also mail it to [bart@shapeways.com](mailto:bart@shapeways.com)). I'll ask our developers to take a look at his.

Cheers,

Bart
