I'm looking for a modeler to turn a 2D into a 3D design.  
The basic design is a small round shape that needs to be converted into to a reference stamp.  
The end result will be somewhat "cookie cutter ish". I'm looking to end up with a 3D file generated that I can send out for printing.

The final product is not going to cut cookies, but needs to be a very accurate stamp made to exact specifications. The stamp will be pressed into foam to create an outline for gluing parts. I can generate a dxf or ai file of the shape.

David
