Hi,

Looking for a reliable, figure sculptor.

Requirement is for a 28mm scale model at measured from floor to eyes of an historical figure - full brief provided including images,dimensions, poses etc.

Sculptor should be aware of 3d print limitations (envisiointec, solidscape, DWS printers) and preferably aware of the needs of 28mm scale models for the war gaming hobby. (ie some parts of model-are over-scaled - eg hands, weapons. ie zbrush, claytools etc can show amazing detail but 1. printers are no capable of reproducing and 2. not suitable for casting in resin or metal....

Initial requirement is for single sculpt in three poses - assuming every thing pans out then multiple sculpts (ie variants on clothing/accessories and poses required) - this would hopefully develop into a very extensive range.

in first instance please email me some examples of you work, turn around times and typical rates (UKÂ£, EURO or US\$) - thanks

regards
andy
