greetings!

I would like to convert my Mongoose to disc brake, with an adapter similar to this one..
<http://www.shapeways.com/model/592479/disc-brake-adapter-for-fisher-level-betty-se.html?li=productBox-search>

I'll somehow have to take exact measurements of my frame, or possibly find some company who can laserscan it.

The distances from centre the axel to the two I.S. mounting points are standards.

Anyone interested in designing as long as i can provide the perfect dimensions of my frame..?

Tom
