I have a wooden C-130A aircraft display model that 3 out of the 4 propellers are broken. The blades are approximately 3/4' inch long. I would like to replace all 4 of them if possible let me know if you can help me.

Hi Ken,

I can help you out with the propellers.

Something similar (wind turbine blade) I created a while back.
GOE222 50x375mm with twist - <http://shpws.me/nQpJ>

I'll send you a PM.

Cheers,
Paul
