I am going to have to admit that I am getting nowhere fast.

I am self taught 3D CAD using Rhino 3D and have been trying to draw complex 3D curved shapes for quite some time. Most other 3D tasks seem to be coming together quite well, but.....

This is the type of thing I am trying to recreate.

Can anyone help me figure out the steps I need to take to try and create this type of train cab

Hi, that shouldn't be an issue in T-splines you can download a demo.

I'd be happy to look at it for you and help you model it, just give me a shout.

Regards

V
