Im a bit new to this whole 3d printing. I had someone create 4 stl files to create a 30 round magazines for an AR-15. Im not sure If I should be uploading in millimeters or inches? I tried in milimeters and it says 2 of my files are to small to create. The inches were ok. Any help?

Hey AMPUSA,

I'm sorry but we will not print any weapons or weapons parts. Please have a look at our content policy:

http://www.shapeways.com/legal/content_policy

We want Shapeways to be for everyone, regardless of their age, gender, orientation or beliefs. This broad sweep of inclusivity means we create boundaries and guidelines to ensure everyone can enjoy Shapeways equally. Our guidelines are guided by both Dutch and US law, and a combination of both.

Thanks!

Bart
