I have designed a small pendant that I want for personal purposes.

(I cleaned up the design since the original post)

I have already designed the shape of it and I know how I want it adjusted.
Basically, I want someone to turn my design mock-up into a 3D model.

I can't pay very much, so lowest bid will probably get the job. For someone who is decent at 3D modeling, it should be a very quick and easy job.
Please respond if you're interested and give me an estimate.

Thank you!
