Hey everyone! I'm Garrett and I've been designing 3D puzzles for a few months now. Recently I was pointed to this site from another forum as a great place for 3D printing services. It's an awesome system!

Anyways, check out my shop for some master parts for 3D puzzles.

Some examples of my work:

http://www.youtube.com/watch?v=9RyBURilLzY&feature=chann el

http://www.youtube.com/watch?v=95Hh2hDuGGw&feature=relat ed

http://www.youtube.com/watch?v=gu9nSR0Ebnw

http://www.youtube.com/watch?v=_vfJis8Kbvs&feature=relat ed

All of these were made by copying FDM printed parts. I'm excited to try the Objet and SLS services here

Wow amazing work there fella, did you come up with the designs, they seem to move very smooth, what probs if any have you had?

Well done

V

The Gigaminx and 3x3x4 are not my design but the rest are.

The helicopter cube gave me a lot of trouble early on but I did a redesign and now it's much better.
