Hello my name is James Williams and I am owner of Titan Art. I have several years of experience in a variety of creative fields including game design and product modeling. I currently specialize in producing high quality models/renders for product developers, most of which happen to be automotive and inventions. This means that I see a ton of different concepts come across my desk. We also provide fair prices for start-ups. In addition to my extensive modeling experience, I have strong communication skills coupled with my ability to turn projects around quickly. My broad design background makes me an excellent candidate for your project. Thank you for your consideration.

James Williams
