Hi all,

I would like to show you the Euro ring.

It is made for people that are always looking for a one euro coin, for example to get a trolley in the supermarket or a coffee in the coffee machine.

It is very simple (just a ring with 3 arms) so that the price keeps quite low. But hopefully, it is still very handy.

You can insert a 1 euro coin in it, and it will stay blocked by the arms while still being able to roll freely.

It have to be in WSF (or any colored version of this material) because the arms have to be flexible.

Here are some extra pictures:

See it in action in this video.

Choose carefully your coin, and you can turn it into a piece of art !

One euro, anyone ?
