Hi Shapeways fans,

Crazy Six is a twisty puzzle, related to Rubik's Cube. It looks like a 6x6x6, but with some circular faces. When turning, the faces seem strangely connected.

Check out the photos below.

Enjoy!

Oscar, have you thought of making your standard Rubix cube downloadable so we can make our own renditions? or would that give away too many secretes to how you make the more complex ones without paying all that money for them?
