Hi Shapeways fans,

Bermuda Rhomdo is a puzzle that can be built using parts of Bermuda Minx by MF8. It has the geometry of Eric Vergo's Rhomdo puzzle.

After seeing Bermuda Comet and Bermuda Jumblix, both "core-mods" of Bermuda Minx, I started thinking whether there would be a fourth geometry that can use Bermuda Minx pieces. Then I remembered Rhomdo, and surprise-surprise, also that geometry can be built from these pieces.

I find it quite surprising that pieces of a puzzle can be reused for another puzzle with a completely different geometry. I find it even more surprising that the pieces can be used for four different geometries in total. Or would there be a fifth geometry as well? Do we know any other twisty puzzles that can be "core-modded" into each other?

Watch the YouTube video.

Buy the core at my Shapeways Shop.

Buy Bermuda Minxes at HKknowstore.
