I've made a model "co-creator" for error, can I revert it to a normal model without delete it and upload it again? thanks in advance.

Hi,

To keep a steady stream of improvements, we take not to big steps at a time. Hence you can make something a co-creator, but there is no public un-template (yet).

When the co-creator is not published, other people viewing your model will see it as a normal model (so no harm there).

If you really foresee that the model will not become a co-creator in the future also, I can take the co-creator template flag off.

If you want me to do that, please send me a PM with your login name and the modelid.

Kind regards, Arno

Thanks for the answer

I'll leave it as it is.
