Hey guys,

Something strange in my shop front, one model is showing the wrong price, and the other says "not for sale" when it is ?

Both when I'm logged in and not, also on other browsers and pc's.

And it doesn't look like a caching error as it's been at least the whole day today.

Did it fix itself yet? cus, my shop did that, and it was weird... but after a little while it stopped and went back to normal. I THINK it may have been some update (render bot) working on some stuff.

dunno, but its all good now.

The "not for sale" thing fixed itself, but still pretty weird.

However the pricing issue isn't and I have seen the error on multiple pages.

There seems to be a prices difference of \$1.50 or \$1.78
(regardless of material..?)

For example "Little devil"

http://www.shapeways.com/model/40269/little_devil.html

In the gallery it lists as :

\$22.56

When i click on it, the model page shows : \$24.35

Another example, the purple tentacle :

On the shop page <http://www.shapeways.com/shops/stuff>

it says :\$11.46

On the model page \$13.25

The problem seems to be restricted to single material objects ?
but not specific to materials ?

Edit : removed redundant info, to avoid confusion.
