Hello Shapeways,

I am trying to login to my account, but I can't.

Actually, I am logged in right now, but I cannot access "my designs" page. Every time I click on "my designs", I am suddenly directed to the user login page.

I am on a MacOS X Snow Leopard using Safari browser.

Any help would be welcome.

Best regards,

DF

I have run across this issue a few times myself, usually a restart of the browser works. A few times I had to restart my computer, and found out it was because of a stupid windows explorer pop up even though I view shapeways of firefox, I just use IE for an internet streaming station that for some reason stopped working on firefox.

Indeed, looks like a browser issue...

I can login via Firefox and access everything, but not with Safari anymore...

Thanks!
