Hi,

I had great success in repairing a robotic arm thanks to 3d printing from Shapeways, see my introduction post here :

<http://www.shapeways.com/forum/index.php?t=msg&th=244&amp;start=0>

I am staging a little action video, featuring apricots, a robot, and 2 3D printed parts from shapeways...

It would be cool to be able to add videos to a model, along with pictures. Of course it takes more space than picture, formats have to be converted, etc, but IMHO it would be a cool idea.

Hello everyone,

I saw the video of the robot yay, it really owns it myself super.Je YOUPI this robot.

is it possible to get clarification on the interface of the robot and the PC? sue and the control software.

I am close to buying the software interface and programming robot YOUPI.

Thank you very much

JS
