Hi guys,

Im a noob to all of this and cant seem to find the error in my model. I have run it through Cad Span and fixed the errors, however it still says it is not manifold.

The error message received is the following "Only manifold objects can be printed".

Any help would be great.

hmm, ok I just ran it through again and it says it is printable. I'm a little confused on why it didn't work the first and second time but I guess the 3rd time is the charm.
