Rob is working on his third project for me, and I must say I HIGHLY recommend him.

Not only is he talented, but he's very fast and pays close attention to instructions and detail.

Thanks Rob!

I'm a noob to the whole 3D printing business, so some things went wrong with my initial design.

I posted my problem on the boards here and within the hour BAROBA had fixed this for me. We had to post back and forth a few times, without any trouble.

BAROBA is a A+ dude in my book! We will meet again
