no i don't want to remove negative comments from one of my designs, i just want to remove one of my own comments on one of my own product pages. I posted a link to the drawing template on a co-creator and that link has since changed. I've now put the correct link in the description block, but the old incorrect remains in the comments.

http://www.shapeways.com/model/119276/canvas_wrap___positive.html

can i get some help?

I have removed the comment. No problem.

Next time just click on the inappropriate link and your comment is removed after review.
