About me: Having fun creating models and printing them at SHAPEWAYS since 2009.

Articulated designs are my favorites, with some success so far, printing chainmail. Of course, that means I want to create more interesting and more challenging objects, especially with combined materials.

Expertise: Jewelry and industrial design at the University of Washington and The Art Institute of Seattle

Experience: Designing and printing or cutting 3D objects out of RHINO 3D since 2004

Portfolio: <http://www.shapeways.com/shops/keizer> and  
<http://www.eskimo.com/~crkeizer/gallery.html>
