
Subject: My design but not my design?

I was looking over some old posts on another board, and found a link I'd posted to my Turbo Rifle model.

http://www.shapeways.com/model/141148/turbo_rifle.html

For no particular reason, I clicked it. But when I did, I noticed that at the top-right, where it would normally say "back to Drawn-Steel Hero's designs"... it actually had a link to clsn's designs.

Any idea why this might be?

Andy

I suspect it goes back to the last Design page you visited (not clns's one, in my case...)

A bug has to be fixed!

Yeah, it says something else for me. Weird, I'll pass it on to our web team.
