Hey Shapers

Here are 2 pics of my Coasters of iPhone Apps in Full Color that arrived to customers.

I want to point out that the white is back ! meaning shapeways apparently listens to the community and looks like have perfected the wax coating process so the model's white color doesn't turn into off-white after waxing.

This is a very important issue - with a real white background all shades and colors look much more amazing.

If you want your own photo,pic,cartoon on a single coaster try this - [Print-A-Coaster](#)

Cheers,
Dizingof
