See topic title.

Selecting an existing shipping address does not work. Must always create a new entry for the same address into an ever-growing list of identical shipping addresses.

We will look into this asap.

Thanks.

Does this happen after you have added an item to your cart and have started the checkout process?

When I try to replicate the problem, I see my shipping address prefilled in the shipping address fields as it should be (but I have only one address saved).

How long has this problem been occurring for you?

Thanks for the feedback,
Ben
