Two new rings, both bound for clients. Swirl is abstract, and designed to be adjustable for any ring size. Cherubim is custom-fit to the specific stone and ring size of a friend; the design is based on the cover artwork of Madeleine D'Engle's novel "A Wind in the Door", which depicts a cloud of eyes and wings.

Nice designs but how is the Swirl adjustable? It has been my experience that s/s does not bend

as much as *snap* ...

Glenn

I assumed that the digital design can be easily adjusted to any ring size, not that the final model itself is adjustable.
