Hi Shapeways,

After adding the frosted detail to your material options, it has taken priority over all other materials on each of my models, causing them to appear more costly in a search. I wondered if it would be possible to have the option to select a default material for each model, which in turn would display the price of the item in the specified material.

Thanks,

Michael

I would like to second this request

.
In my own case I modified some item to make use of the thinner walls now possible with Frosted Detail. But this has the effect of making them no longer printable in WSF .

If I leave both the ultra detail and the normal frosted detail as options the more expensive Ultra detail shows up as the default price making them look very expensive.

My solution is to only offer them in Frosted detail but this is not ideal.

Tom
