Mom loves it and brother kept it without getting upset. I have one gold plated glossy, one stainless and I have three more on the way ; gold plated matte, one in WSF without the inner spindles part to put my brother's picture in, and one in foggy glass. I'll show some pictures later after the next get here. these should arrive Sometime in the next 12 days.

This is made to look like a classic sailors wheel with handles that at full size would be easily handled and are meant to help your hands grip and keep firm a captain's, first mate's, or other crew/ sailor's course and heading from veering. (provided a willing soul mans the helm)

Ofcourse this is a jewelry, pendant, or decoration sized piece. miniature.

Thanks. Pictures to come soon. Thanks a lot!
