Hi everyone,

I'm building a new PC case and it's designed with significant reliance on 3D printing with Shapeways.

I've posted a project log here.

AFAIK, it's the first time anyone has done this. Comments welcomed!

Sweet!

How long have you been working on this project for? What prompted it? Look forward to hearing more.

I've been working on the CAD design for about 2 months and only just finalise them recently.

What prompted the idea? Well, I'm always into building a new PC case and designing. Using 3D printing instead of traditional manufacturing, the design can evolve easily modified. Thanks!!

Thanks!

More updates featuring Shapeways parts.
(Please follow the above link if you'd like to see more of the rest of the build)

This is hot. An adventurous design. The black printed parts look so good. This unlike any acrylic case I have ever see - it looks light.

Wow amazing!

That black printed thing with your logo is really cool!

can't wait to see new pictures!

Thanks! I'm glad people liked my design.

This is just my prototype. I'm planning to re-design based on what I've learn and I'll definitely post back here again.
