---

I have models that are not really intended to be sold in the high dollar materials. How can I stop my designs from showing that Stainless price?

Heres the glitch... I USUALLY want to include the big \$ materials as options... I just don't want them to be the featured mat/price...

So my question is how can I select a featured material (and therefore, price)?

Thanks for reading this!

Lefty

Unfortunately there is not a way yet. If you have the piece labeled as jewelry it will default to steel I believe. Otherwise it will default to wsf.
