I'm very fast. I take 2 days usually. I used zbrush 4. I was a beta tester for pixologic so I know the software really well.

Hi there, I would have to see the picture of what you want. If it's really complex then I would charge more.

Great work mate, Very Impressive!

The effect of light or what might seem like it on the belly of the fat blue one is a real eye candy.

Are those painted by hand? They look so crispy!

Shapeways get a mention in printing the master that keeps the detail intact for these cool toys that change color.
