About me: I am a Dutch full-time freelance industrial design engineer. I have done big projects such as a 27 ft speedboat in Solidworks, as well as 1:72 scale model planes. I can create from sketch or photo or design from scratch.

I will assist during the whole process to guarantee the best result.

I can even set up mass production if required.

Expertise: Design, Redesign, 3D-modeling, fixing and optimizing files for 3D print.

Experience: 9 yrs Solidworks, 6 yrs Rhino, some experience with 3DS Max and Modo
I have several complex models for 3D printing.

Portfolio: [here](#)

Rate: Depends on the complexity of the product.
