Sweet comparison shot! It would be kind of awesomely bizarre to accessorize by wearing like 12 of these rings at once, in different materials (maybe with gems in a few of their eyes for added variety) all across one's fingers.

These are so beautiful and intriguing. Love seeing them in all of the different finishes and textures as well.

The mood and mystique changes from the finish and the way the light and shadow play off each one.

Nicely done!

(both model and material/product photo's)
