Hey Guys,
I've just uploaded my first design and just want to be sure it's the correct size.

http://www.shapeways.com/model/364313/cs6_logo.html

The page shows its (In CM) 11.4 w x 4.2 d x 0.3 h, I need it to be about 4cm high, is that correct or is it taking the 3D aspect into consideration?

Thanks!

The dimensions are a box that the model would fit into. So your 4.2cm would be from the bottom to the top the '6' The 11.4cm would be from the left of 'Cluc' to the right of the '6' and the 0.3cm would be from the underside to the topside of the '6'.

Hope that makes sense

Paul

Crystal clear! That makes perfect sense.

Thanks for that. Now the only hard part is waiting for my model to come
