Hi,

Does somebody know how you put a link to another design in one of your designs description? for example: you refer to a pendant belonging to ring, ...

kind regards

The description is in basic HTML. Just use a <a> tags like this example:

Quote:You can also have a look to the Concave D4

Be careful to use the correct URL (your page must not be edit mode where a /edit/ appears in the URL). You can stop the URL after the "/" that comes after the model number, the remaining characters are useless.
