Hi Shapeways fans,

Moby Maze is a mechanical maze based on a Mobius Strip. Half of the maze is at one side, the other half is, well, at the same side. The object is to remove the ring. It was originally prototyped by George Miller of PuzzlePalace.com.

Watch the YouTube video.

Buy the puzzle at my Shapeways Shop.

Read more at the Non-Twisty Puzzles Forum.

Check out the photos below.

Enjoy!

Oskar

Weird, I've never seen your prints come out with such obvious print lines. What material was it printed in Oskar?

As always, and awesome puzzle, and one even I think I could solve! A great idea and a great result. Is there any limit to how the maze can be altered?

A pre-historic (well pre-Shapeways) SLS printer from the year 2007. The Shapeways version will be completely smooth, as usual.
