I just created a shop. It is telling me that everything is saved, but I do not know if it is working.

Edit: My shop does appear now

I made a model for sale but it does not appear in my inventory screen in my shop manager. Is my item supposed to appear here? I don't see any other way to add items to inventory other than just making them for sale to the public, is this true?

I created Sections for my shop but do not know how to assign items to specific sections. Is this supposed to be done in the inventory screen of the shop manager?

Edit: My CSV Markup file is showing the proper markup now.

Maybe I simply do not know how to do this stuff yet but is there a tutorial on this? Is there some external problem going on that is preventing things from working? Does it take a day to show changes? I'm I just using the system incorrectly?

Down at the bottom of this page is a link under learn more for buy and sell
(<http://www.shapeways.com/shop/about>) Maybe that will help you?
