Is there a priority option for faster 3d printing along with faster shipping and customs clearing( I am in Las Vegas, Nevada, USA)? I am looking to order a part that is 23"x10"x2.25" inches and would LIKE to have it the next day. I know that is not possible, but what, if anything can be done to speed up the process? Can I buy the person doing the printing a case of beer? Schedule Overtime? or is the 3d printer itself the bottle neck in the process?

Thanks lvdata

Paul

Currently there isn't an option with shapeways to get parts faster. You could google next day parts though. The difference in prices from Shapeways and the places you find would be like buying them a whole brewery though (exaggerating a little bit)
