well I'm quite an outsider here, I'm more a mold'n cast dood.

all things I've done with shapeways is a commission project of a prize item which turned almost to a second work to me. I had to model the molds and cast hundreds of pieces. so I actually work as hard as a chinese. then I got a project of mine, a werewolf that's fully posable(Garou), it's here, work in progress.suggestions are welcome.

bye all of you,

---
