Hi There,

I want to try out 3D Printing making a custom Iphone case for a friend. I do have some experience with 3D Modeling, but not printing. So here's my problem: I don't have an Iphone lying around to take basic measurements and see where to cut holes etc.

Where could I get a "basic" case model that regards the Iphones dimensions and buttons to start from?

I also used this information to make my iPhone cases,  
see my shop 3D4all

<http://www.shapeways.com/shops/3d4all>
